THE BUSINESS OF CROP NUTRITION

PotashCorp-eKonomics.com

..... BY

PotashCorp
Helping Nature Provide

Data Sources:

Removal Data: USDA: P2O5 and K2O nutrient removal obtained from harvested tonnage of crops from each state. Manure applied nutrients subtracted from harvest removal.

Input Data: AAPFCO fertilizer consumption data subtracted from the removal information to obtain a mass balance of nutrient levels for each year for each state. "Commercial Fertilizers 2012" is available; all earlier versions are still available. National fertilizer use data are available in a hard-copy publication, "Commercial Fertilizers 2012", which is available from The Fertilizer Institute (TFI). The Association of American Plant Food Control Officials (AAPFCO), in partnership with TFI, has published the 2012 edition of the Commercial Fertilizer Report. The report, which documents consumption by nutrient and by state, is \$30 per copy for members of TFI and AAPFCO, and \$100 per copy for non-members.

Excel or ASCII text formats of the Commercial Fertilizer 2012 data are available. AAPFCO sells the FY2012 and FY2011 data sets for \$500 each. All other historic data (2010-1985) are \$200 each. The data are available on CD or via e-mail.

Important to Note: Soil testing is statewide and can differ within regions within a state. Nutrient management should occur on a site-specific basis where management objectives and the needs of individual fields and, in many cases, areas within fields, are recognized. Therefore, a general soil test summary like this one cannot reflect the specific needs of individual farms. Its value lies in calling attention to broad nutrient needs, trends, and challenges, and in motivating educational and action programs that are in turn relevant to growers and their advisers.
